Outline

- Context
- Development of the **Piripiri Evidence Centre (PEC)** in health care
- Partners
 - Brazilian Evidence-Informed Policy Network (EVIPNet Brazil)
 - Latin American and Caribbean Center on Health Sciences Information (BIREME/PAHO)
 - MoH of Brazil
 - Municipal government of Piripiri, Piauí, Brazil
- Centre's vision, members, mandate, activities and preliminary results

Regional context

Health Agenda for Americas 2008-17

(...)

g) Harnessing Knowledge, Science, and Technology

65. Countries should synthesize, systematically access, and use the evidence in decision-making to selected relevant and effective interventions. To fulfil this tasks in Latin America and the Caribbean, improvement in the development and support of local capacities is needed.

Regional context

EVIPNet Americas

Promotes the use of evidence in health policy-making in focusing on LMICs

Partnership between policy-makers, researchers and civil society in order to facilitate both policy development and policy implementation

Brazilian context

BRASIL

EVIPNet Brazil is the response to EVIPNet initiative supported by PAHO to promote and facilitate the use of evidence to inform health policies and decision-making process on health care

Brazilian context

BIREME, PAHO and MoH cooperation

Scientific information management to EVIPNet

- EVIPNet Brazil Portal
- Collaborative Space to EVIPNet Brazil
- Workshops on EVIPNet methodology based on SUPPORT project
- SUPPORT Tools publication in Portuguese
- Brazilian Policy Brief on Perinatal Mortality

Local context

Window of opportunity

- S&T Special Secretary of CONASEMS
- HTAI 2008 (CAN)
- Evidence-based training (UofT-SESAPI)
- Evidence-based training (Brazilian Cochrane Centre)
- Health Municipal Conference (2009)
- Deliberative Dialogue (McMaster Health Forum)

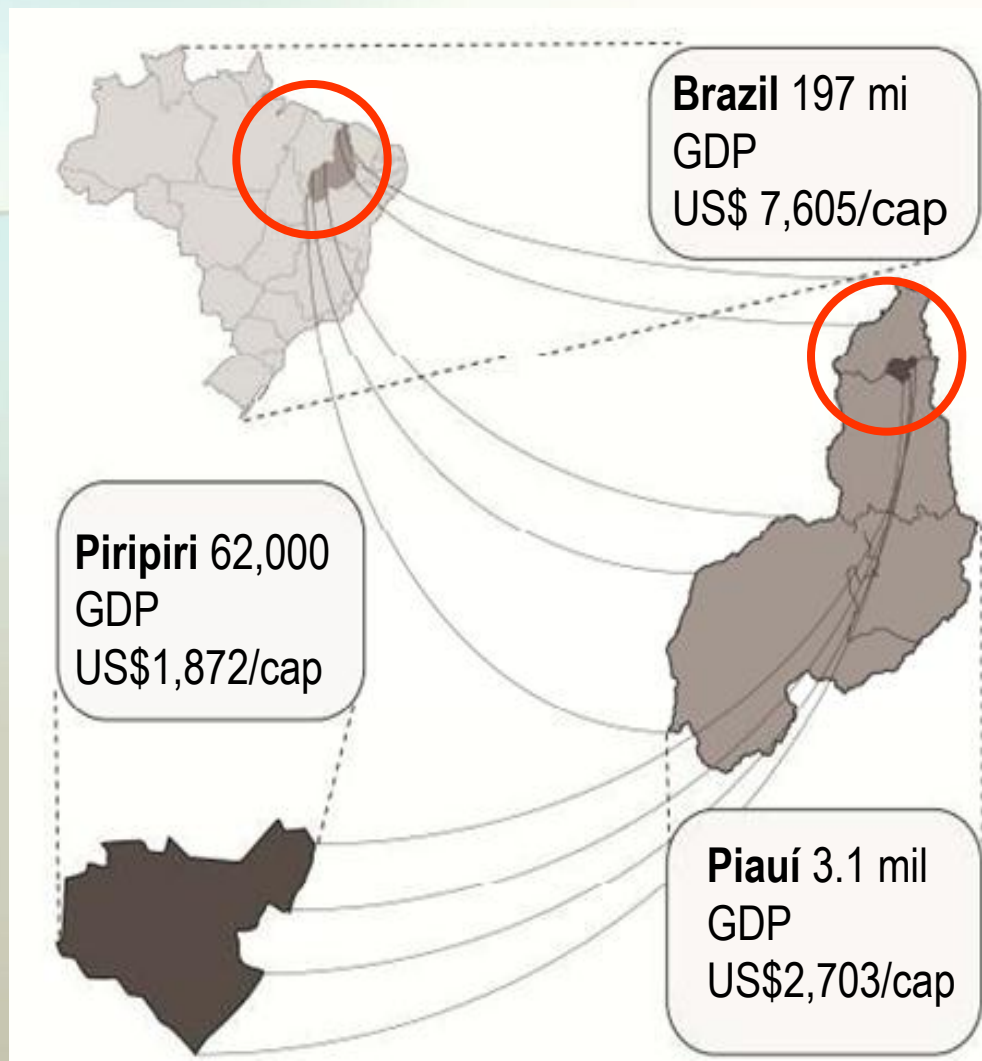

Political will and social entrepreneur

**The Virtual Health Library Station and Piripiri
Evidence Centre, March 2010**

Local context

Piripiri, Brazil

- 62,000 inhabitants
- Brazilian poorest region
- Only public health system with full coverage by Family Health Strategy
- Health annual expenditure US\$ 160/cap

Piripiri Evidence Centre

MISSION

- Promote universal access to information sources through digital inclusion in health
- Promote use of health evidence locally to improve decision-making process
- Promote exchange among managers, health professionals and other stakeholders

TEAM

- Health care providers trained in:
 - Evidence-based healthcare
 - SUPPORT Tools for evidence-informed health policymaking

Piripiri Evidence Centre

ACTIVITIES

- Synthesize evidence on local health needs using SUPPORT tools
- Promote Deliberative Dialogues among relevant stakeholders for local dissemination of evidence-informed policy options to address local health problems

By Law n. 032/2010 SMS Piripiri

PRODUCTS

- Two evidence synthesis:
 - Physical activity and prevention / control of hypertension in Primary Health Care (2010)
 - Dengue control in urban space (2011)
- One Deliberative Dialogue (City Council) on health care provider retention in Primary Health Care (2010)
- One Policy Brief on Perinatal Mortality (EVIPNet) (2010)

Piripiri Evidence Centre

Impact

- Informed the Municipal Plan of Antenatal Care
- Supported the decision to implement pay-for-performance scheme for quality improvement in primary care
- Supported the Gym in the Square Program
- Informed the Municipal Emergencial Plan for Dengue Control

Piripiri Evidence Centre

Next steps

- Promote the use of evidence in policy and clinical decision making
- Train healthcare providers on evidence-based healthcare
- Dissemination of process and products
- Train PEC working team in HTA and English
